

STOP | THINK | CONNECT™

Week 2: October 10th through October 14th

From the Break Room to the Boardroom: Creating a Culture of Cybersecurity in the Workplace

All organizations – from large and small businesses to healthcare providers, academic institutions, government agencies and civil society – can experience data breaches or be targets of cybercrime, which can result in stolen intellectual property, theft or personal information or – if our critical infrastructure is attacked – a disruption of our way of life.

Creating a culture of cybersecurity in the workplace with efforts like employee education, training and awareness can help to keep your business safe.

Below are some links to helpful tips and information that can help keep you safe online:
